CHASSIS REGULAR CAB 3500 167.5"WB 84.0CA 6.7L 4X2

SHEAR PLATE HOLE LOCATIONS

NOTE: Because of the curvature of the back of the Dodge Ram cab a minimum clearance maintained at the closest point in the center of the cab back will increase by .28 inches when measured above the frame rails. For example, if you have 3 inches clearance between the cab and applied body at the center you will have 3.28 inches when measured at the frame rails. This is normal acceptable condition
