# 2015 PROMASTER SHIP MODE

ProMasters as shipped from our assembly plant will be in ship mode. This mode disables multiple electrical components to minimize battery drain during shipping and storage. For more detail on which features are disabled, See ship mode feature function chart on page 2.
The tell tale that the vehicle is in ship mode is a flashing battery light in the cluster. There is one condition where the battery lamp will be on all of the time in ship mode. See ship mode charging status table on page 2.

To reconfigure the vehicle to customer mode, follow the instructions below.

• Key OFF

• Headlights OFF

• Key ON

• Right turn signal ON

• Pull multifunction lever all the way to High Beam position (past "flash-to-pass"), and hold for more than 10 seconds.

Pull to High Beam (2nd momentary) position

OFF/DRL Position
